TECHNICAL SKILLS

Languages

TypeScript · JavaScript · Java · Rust · Dart · Python · PHP · SQL

Frontend

React · Next.js · Tailwind CSS · Vite · PWA · Leaflet

Backend & API

Node.js · NestJS · REST API · JWT · RBAC

Databases

PostgreSQL · MySQL · Redis · Supabase

DevOps & CI/CD

Docker · Linux · Nginx · GitHub Actions · Vercel

Cloud

Oracle Cloud (OCI) · AWS · Firebase

Mobile & desktop

Flutter · Android · Tauri

Testing & tooling

Git · Vitest · Playwright · Testing Library

Nguyen Ngoc Tuyen

Full-Stack Software Engineer

NestJS · Next.js / React · PostgreSQL · Oracle Cloud

2+	10+	2	5
years in IT	projects delivered	Oracle certifications	self-built products

PROFILE

Full-Stack Software Engineer with **over two years of professional IT experience**, currently building enterprise and public-sector systems at **ICS International Cybersecurity JSC**. Fluent across the TypeScript ecosystem from interface to server (**NestJS, Next.js/React, PostgreSQL, Redis, Docker**), with security treated as a first-class concern in authentication and authorization. **Oracle Cloud Infrastructure 2025 Certified Architect Associate**. Also designs and ships complete products independently, including Linguo, an AI-powered language-learning platform, and a desktop PDF editor written in Rust.

CORE COMPETENCIES

- ✓ End-to-end full-stack delivery: UI, API and database
- ✓ PostgreSQL, Redis, Docker, CI/CD and cloud (OCI)
- ✓ REST API design, JWT authentication, role-based access
- ✓ Offline-first PWAs, AI/LLM features, automated testing

WORK EXPERIENCE

IT Engineer / Full-Stack Developer

07/2025 – Present

ICS International Cybersecurity JSC · Hanoi

- Build features from interface to server (Next.js/React, NestJS APIs, PostgreSQL/Redis) for **enterprise and government systems**: CRM, HRM, e-learning, VR360 digital heritage and a Mekong Delta agricultural-mechanization map.
- Own the **CRM Tasks module** (timeline, Kanban, appointments, approvals, reminders) and the **permission model** for projects and tasks.
- Develop REST APIs, business logic, **JWT authentication and data-scoped authorization** to the security standards of a cybersecurity company.
- Work in a large team with a Git branching workflow and Docker environments; maintain, fix and extend features after release.

Backend Developer

09/2024 – 02/2025

Hoc Mai Education JSC · Hanoi

- Built and optimized **Node.js REST APIs** for an online learning platform.
- Designed database schemas, wrote SQL and implemented server-side logic that keeps data consistent and scalable.
- Worked with the frontend and QA teams to integrate APIs, fix defects and release features to production.

Technical Team Manager

03/2023 – 06/2024

Khang Minh Import-Export Manufacturing Co., Ltd · Hanoi

- **Led the technical team**: assigned work, tracked progress and handled incidents.
- Ran the e-commerce channel; built and maintained the company website with HTML, CSS and JavaScript.
- Introduced **AI (Claude)** into daily work for content drafting, automating repetitive tasks and coding support.

CERTIFICATIONS

OCI 2025 Certified Architect Associate
Oracle · 10/2025 – 10/2027

OCI 2025 Certified Foundations Associate
Oracle · 10/2025 – 10/2027

Office Informatics Certificate

EDUCATION

Bachelor of Engineering in Information Technology
Dong A University of Technology
Full-time · 09/2021 – 06/2025

STRENGTHS

Security by default
Authentication, authorization and encryption are planned from the design stage.

Full life-cycle ownership
From requirements and data design to release and maintenance.

Leadership & teamwork
Former technical team manager; works closely with frontend, backend and QA.

Practical use of AI
Uses AI to ship faster and builds AI features into real products.

SELECTED PROJECTS

ENTERPRISE & PUBLIC SECTOR

Enterprise CRM System — Enterprise · 2025–2026
NestJS · Next.js · PostgreSQL · Redis · Docker
Customers, marketing, sales (quotes, orders, contracts), tasks and KPIs, with a drag-and-drop Kanban customer journey. Responsible for the Tasks module, project and task permissions, and the Marketing layouts.

VR360 Digital Heritage for Local Authorities — Government · 2025–2026
Next.js · NestJS · PostgreSQL
Web-based 360° tours with route maps and bilingual narration; interactive 3D silver-filigree artifacts (220,000–250,000 triangles) that visitors can rotate and zoom; management of heritage sites.

Mekong Delta Agricultural Mechanization Map — Government · 2026
Leaflet · OpenStreetMap
Compares cooperatives' machinery capacity with seasonal demand across 11 provinces: clustered map coloured by coverage, multi-criteria filters, an overview dashboard, sync logs with the cooperative app, and norms linked to official decrees.

E-learning Education Platform — Enterprise · 2025–2026
Next.js · NestJS · PostgreSQL · Redis
Course catalog and a 4-step instructor sign-up flow; instructors upload videos, materials and quizzes and draft content with AI tools; light and dark themes and multiple languages.

Human Resource Management System (HRM) — Enterprise · 2025–2026
Java · JSP
Attendance, project and Kanban task management, an assign–accept–approve workflow, change history and an internal document library.

SELF-BUILT PRODUCTS

Linguo — Language Learning for Vietnamese Speakers — Product · 2026
React · TypeScript · Supabase · PWA · FSRS
English, Korean, Japanese and German aligned with CEFR, TOPIK, JLPT and Goethe: adaptive placement tests, personalized paths, FSRS spaced repetition, mock exams, an AI tutor and role-play conversations. Offline-first PWA, AI via Edge Functions, RLS security and automated CI/CD.

FoFreeXit — PDF Editor — Open source · 2026
Rust · Tauri · PDFium · QPDF
A free desktop alternative to Foxit: Word-like editing that preserves Vietnamese fonts, AES-256 encryption, true redaction, PAdES digital signatures, Vietnamese/English OCR, Word/Excel conversion and an AI assistant that takes natural-language commands.

Fitora — AI Nutrition & Fitness Coach — Product · 2026
React · TypeScript · Supabase · PostgreSQL
Snap a meal and AI estimates its calories and macros; food diary, workout planner, body tracking and chart-based reports; user data protected by Row-Level Security; installable as an app (PWA).

Vyora — 12-Week Gym Program — Personal · 2026
Next.js · TypeScript · Tailwind CSS · Vitest
A mobile-first web app that shows the day's workout with sets, reps and how-to videos; built for accessibility (keyboard navigation, focus management, large touch targets).

Hotel Management ERP System — Personal · 2024–2025
PHP · MySQL · Chart.js · jQuery
A guest booking website and an admin panel with a revenue and profit dashboard, rooms, attendance, payroll and inventory; bulk import from Excel; separate administrator and staff roles.
